# 1. Brand Overview

---

## About Blockify

Blockify is a Vietnamese SaaS company founded in 2019. It builds a suite of fraud prevention and ecommerce optimization apps, primarily for Shopify merchants — with recent expansion to Wix Commerce. The company operates under Blockify Solutions and is led by founder Joseph Nguyen.

| Attribute | Detail |
|---|---|
| **Founded** | 2019 |
| **Headquarters** | Vietnam (team operates globally, 24/7 support) |
| **Primary platform** | Shopify App Store (Built for Shopify certified) |
| **Also on** | Wix Commerce |
| **Merchants served** | 20,000+ worldwide |
| **Reviews** | 500+ five-star reviews |
| **Monthly coverage** | 40B+ verified traffic events |
| **Fraud blocked** | $36M+ in high-risk orders cancelled monthly |

## Vision

*"Our vision is to enhance security and boost your business sales."*

More fully: to become the most trusted partner for Shopify businesses, helping them operate securely and achieve exceptional growth.

## Mission

To provide a powerful ecosystem of tools that helps online merchants:

- Prevent fraud — eliminate high-risk orders, block malicious IPs, countries, and bots
- Customize checkout — enhance experience with strict, targeted payment and shipping rules
- Ensure legal compliance — verify customer age to protect stores and meet regulatory requirements

## Brand Positioning

| Dimension | Definition |
|---|---|

| | |
|---|---|
| **Category** | Ecommerce security & optimization SaaS |
| **Target customer** | Shopify merchants — from small stores to Shopify Plus |
| **Promise** | Proactive protection, not reactive damage control |
| **Differentiator** | Built for Shopify (certified), fast support, easy setup |
| **Tone position** | Trustworthy expert — professional without being intimidating |

## Core Brand Values

| Value | What it means |
|---|---|
| **Fast** | Speed in all processes — data handling, app performance, customer support response |
| **Flexible** | Adaptable to merchant needs; tools that work across store types and industries |
| **Feasible** | Focused on practical, resource-efficient solutions — not overkill |
| **Trusted** | 500+ verified five-star reviews; endorsed by Shopify as highest-quality standard |

# 2. Logo

Note: This document is based on visual analysis of blockifyapp.com. Exact logo files and SVG/PNG source assets should be provided separately by the design team.

## Primary Logo

The Blockify wordmark appears in two forms observed across the site:

- Full wordmark: "Blockify" in bold, set in a clean sans-serif typeface. Appears in dark ink (#1A1714) on light backgrounds.
- App icons: Square icons with rounded corners, each product uses a distinct icon (shield/lock motif for Fraud Filter, grid for Checkout Rules, user badge for Age Verification).

## Logo Lockup

The logo appears in the top-left of the navigation. The wordmark is accompanied by a small orange accent dot on some iterations. Always maintain adequate clear space — minimum 20px on all sides.

## Logo Usage Rules

| ✓ DO | ✗ DON'T |
|---|---|
| Use the dark logo on light/white backgrounds | Do not stretch or distort the logo proportions |
| Use on the warm off-white brand background (#F5F2ED) | Do not place the dark logo on dark backgrounds |
| Maintain minimum clear space of 20px on all sides | Do not recolor the wordmark |
| Use the official SVG/PNG source files | Do not add effects: shadows, outlines, gradients |

## Minimum Size

| | |
|---|---|
| **Digital (web/app)** | 120px wide minimum |
| **Print** | 25mm wide minimum |
| **Favicon / App icon** | Use the dedicated app icon, not the wordmark |

# 3. Color Palette

The Blockify color palette is warm, grounded, and professional. The dominant foundation is warm off-white and dark ink — with a bold orange accent that creates energy without aggression. Colors were extracted from live analysis of the website.

## Primary Colors

**Ink**
#1A1714 · RGB 26·23·20

**Accent Orange**
#E8390E · RGB 232·57·14

**Background**
#F5F2ED · RGB 245·242·237

**White**
#FFFFFF · RGB 255·255·255

## Secondary Colors

**Text Muted**
#7A7168 · RGB 122·113·104

**Border**
#E0DAD2 · RGB 224·218·210

**Success Green**
#1A7F4E · RGB 26·127·78

**Info Blue**
#185FA5 · RGB 24·95·165

## Semantic / Status Colors

**Danger Red**
#C41C00 · RGB 196·28·0

**Warning Amber**
#B85C00 · RGB 184·92·0

**Ink Secondary**
#5C5750 · RGB 92·87·80

**Surface**
#F7F4F0 · RGB 247·244·240

## Color Usage Guidelines

| Color | Primary Usage |
|---|---|
| **Ink (#1A1714)** | Headlines, body text, nav, CTA buttons, footer background |
| **Accent Orange (#E8390E)** | Primary CTA, active states, brand accents, horizontal rules, alert highlights |
| **Background (#F5F2ED)** | Page background, input field fill, section alternation |
| **White (#FFFFFF)** | Card surfaces, modal backgrounds, content containers |
| **Text Muted (#7A7168)** | Supporting text, metadata, timestamps, captions |

| | |
|---|---|
| **Border (#E0DAD2)** | Dividers, input borders, card outlines |
| **Success Green (#1A7F4E)** | Positive states, Built for Shopify badge, safe indicators |
| **Info Blue (#185FA5)** | Links, informational states, secondary accent |
| **Danger Red (#C41C00)** | Error states, high-risk indicators, warnings |

## Color Combinations — Approved Pairings

| Combination | Specification |
|---|---|
| **Dark CTA button** | Ink background (#1A1714) + White text (#FFFFFF) |
| **Primary CTA hover** | Accent Orange (#E8390E) + White text (#FFFFFF) |
| **Page background** | Background (#F5F2ED) + Ink text (#1A1714) |
| **Card surface** | White (#FFFFFF) + Border (#E0DAD2) + Ink text |
| **Success badge** | Green (#1A7F4E) fill + White text |
| **Warning state** | Amber (#B85C00) text on light amber background |
| **Alert/Error** | Red (#C41C00) text on light red background |

# 4. Typography

Observed from site: The website uses a clean sans-serif system that appears to be a custom or slightly styled sans typeface. Exact font names should be confirmed from the CSS source file. The patterns below are derived from visual analysis.

## Typeface System

| Role | Description |
|---|---|
| **Display / Headings** | Bold sans-serif — geometric, clean, high-weight. Used for H1, H2, hero text, stat numbers. |
| **Body / UI** | Regular sans-serif — same family or harmonious companion. Used for body copy, labels, nav, buttons. |
| **Monospace (optional)** | Used for code snippets in documentation / knowledge base only. |

## Type Scale

| Element | Specification |
|---|---|
| **Hero / Display H1** | 36–52px · Bold · Letter-spacing: -0.02em · Line-height: 1.1 |
| **H1 — Page title** | 28–36px · Bold · Letter-spacing: -0.01em · Line-height: 1.2 |
| **H2 — Section** | 20–24px · Bold · Line-height: 1.3 |
| **H3 — Sub-section** | 16–18px · Semi-bold · Line-height: 1.4 |
| **Body — Default** | 16px · Regular · Line-height: 1.6–1.7 |
| **Body — Small** | 14px · Regular · Line-height: 1.6 |
| **Caption / Label** | 11–12px · Medium · Uppercase + letter-spacing: 0.04–0.06em |
| **Stat / Number** | 36–56px · Bold · Used in metrics sections |
| **Button** | 14–15px · Medium · Letter-spacing: 0.01em |

## Typography Rules

| ✓ DO | ✗ DON'T |
|---|---|
| Use bold weight for all headings | Do not use more than 2 font weights in a single component |
| Use uppercase + letter-spacing for small labels and section tags | Do not set body text below 14px |

| | |
|---|---|
| Maintain generous line-height (1.6+) for body text | Do not use italic for interface elements (only quotes/testimonials) |
| Use stat/number style for key metric displays | Do not mix fonts from unrelated typeface families |

# 5. Voice & Tone

## Brand Voice

Blockify's voice is that of a knowledgeable, trustworthy partner — someone who understands the anxiety of running an online store and has a clear, practical solution. The voice is confident without being arrogant, technical without being overwhelming.

| Trait | What it means |
|---|---|
| **Confident** | We state what Blockify does clearly. We don't hedge. We don't over-qualify. |
| **Clear** | We write for merchants, not developers. Simple language. No jargon without explanation. |
| **Reassuring** | We acknowledge that fraud is stressful. We position Blockify as peace of mind. |
| **Action-oriented** | We move people toward a next step. Every piece of copy has a purpose. |
| **Friendly** | Warm, not corporate. Human, not robotic. Support team names appear in reviews — this is intentional. |

## Tone by Context

| Context | Tone adjustment |
|---|---|
| **Homepage / Marketing** | Confident, punchy, benefit-first. Short sentences. Strong verbs. |
| **Product pages** | Clear, specific, feature-driven. Let the functionality speak. |
| **Pricing page** | Transparent and direct. 'Straightforward pricing that grows with you.' |
| **Blog / Content** | Educational, practical, helpful. Problem-first framing. |
| **Support / Docs** | Step-by-step, patient, precise. Anticipate confusion. |
| **Error messages** | Calm, clear, actionable. Never blame the user. |
| **Reviews response** | Personal, warm, grateful. Use merchant names. |

## Voice Examples

| ✓ DO | ✗ DON'T |
|---|---|
| "Prevent fraudulent orders — before they happen." | "Our solution may help you possibly reduce some fraud." |
| "Protect your store from entry to checkout." | "A comprehensive integrated platform for managing |

| | |
|---|---|
| | risk." |
| "Blockify is the #1 solution for fraud prevention." | "Utilize our advanced IP-based blocking algorithms." |
| "Try for free. No commitment." | "Please note that results may vary by merchant." |
| "24/7 Global Support Coverage." | "We attempt to provide support when available." |

# 6. Messaging Framework

---

## Brand Tagline

### *"Secure & Grow Your Shopify Store"*

This tagline appears in the browser title tag and meta description. It positions Blockify as both a security tool AND a growth driver — addressing both merchant fears (losing money to fraud) and aspirations (growing their business).

## Hero Statement

*"Prevent Fraudulent — to secure and grow your Shopify store"*

Note: The word 'Fraudulent' is used as a noun shorthand for fraudulent activity. This is a deliberate stylistic choice — punchy, slightly unconventional.

## Elevator Pitch

*"Blockify is an ecosystem that protects your store from entry to checkout, securing your checkout page and enhancing business efficiency."*

## Key Messages by Audience

| Audience | Key message |
|---|---|
| **Small Shopify store** | Easy setup, free tier, peace of mind — protect your store without needing a tech team. |
| **Growing store** | Automated fraud prevention that scales with your volume. Stop losing money to chargebacks. |
| **Shopify Plus merchant** | Enterprise-grade protection with full visitor analytics, auto-cancellation, and VIP support. |
| **Wix merchant** | Same trusted protection, now on Wix Commerce. |
| **Regulated industry** | Age Verification ensures legal compliance without hurting conversion. |

## Proof Points (Use in copy)

- 20,000+ merchants worldwide trust Blockify
- 500+ five-star reviews on the Shopify App Store

- $36M+ in high-risk orders cancelled monthly
- 40B+ verified traffic events monthly
- 98.7% reduction in fraud and harmful access
- +30% purchase rate improvement with checkout rules
- $50M saved in chargebacks and disputes
- 92% time saved on fraud and bot management
- 24/7 global support — responds even at midnight
- Built for Shopify — meets Shopify's highest quality standards

# 7. Visual Style

## Overall Aesthetic

Blockify's visual style is clean, structured, and trustworthy. It uses warmth (off-white backgrounds, soft borders) to feel approachable while maintaining professional credibility. The bold orange accent creates confidence and urgency without alarm.

| Element | Approach |
|---|---|
| **Background tone** | Warm off-white (#F5F2ED) — not pure white, giving a premium, considered feel |
| **Surface cards** | White cards with thin warm-toned borders (#E0DAD2) — clean, elevated |
| **Spacing** | Generous — sections breathe. Not dense. Whitespace is intentional. |
| **Corner radius** | Moderate — 8–12px for most elements, 20px for large cards |
| **Shadows** | Minimal or absent — the design avoids heavy drop shadows |
| **Icons** | Clean line/filled SVG style — geometric, consistent stroke weight |
| **Images / Screenshots** | Product UI screenshots, real merchant photos, professional imagery |
| **Illustrations** | Simple, diagrammatic — not decorative illustration style |

## Layout Principles

- Single-column content on mobile, 2-column max on desktop for most sections
- Sticky navigation — always accessible, never intrusive
- Hero section: left-aligned text, right-aligned product visual or metric
- Stats displayed in a horizontal row with large numerals — creates impact
- Testimonials in a card carousel — real names, real countries shown
- CTA buttons: dark (Ink) or Orange. No light/ghost CTAs for primary actions

## Button Styles

| Button type | Specification |
|---|---|
| **Primary CTA** | Background: Ink (#1A1714) → hover: Accent Orange. Text: White. Padding: 14–16px 24–28px. Radius: 8px. |
| **Secondary CTA** | Background: transparent. Border: Ink. Text: Ink. Used for less important actions. |
| **Nav CTA** | Background: Ink. Text: White. Smaller padding. Rounded pill (radius: 99px). |

| | |
|---|---|
| **Inline link** | Text color: Ink or Info Blue. Underline on hover only. |

## Iconography

- Style: clean SVG, consistent 1.5–2px stroke weight OR solid fill
- Color: matches the section context — dark icons on light backgrounds
- Size: 24px standard, 48px for feature icons in cards
- Each product has a dedicated icon — avoid generic stock icons

# 8. Product Naming

## Product Name System

All products follow the pattern: Blockify + [Function Descriptor]. The 'Blockify' prefix anchors each product to the parent brand while the descriptor communicates the core capability clearly.

| Product Name | Core Function |
|---|---|
| **Blockify Fraud Filter & Blocker** | Primary product — IP blocking, country blocking, bot filtering, fraud prevention |
| **Blockify Checkout Rules & COD** | Checkout customization — payment/shipping rules, COD configuration |
| **Blockify Age Verification 18+** | Age gate popup — legal compliance for regulated products |

## Naming Rules

| ✓ DO | ✗ DON'T |
|---|---|
| Always use the full product name on first reference: 'Blockify Fraud Filter & Blocker' | Do not abbreviate to acronyms: not 'BFF', 'BCR', 'BAV' |
| Abbreviate on repeat: 'Fraud Filter', 'Checkout Rules', 'Age Verification' | Do not drop 'Blockify' prefix on the first mention in a document |
| Capitalize all main words in product names | Do not change & to 'and' in product names — keep the '&' |
| Use '18+' suffix for Age Verification — it communicates the purpose instantly | Do not invent new product name formats without brand review |

## Platform Naming

| | |
|---|---|
| **Shopify version** | Use the Shopify App Store product name exactly as listed |
| **Wix version** | Same product name, specify platform: 'Blockify Fraud Filter & Blocker for Wix' |
| **Website domain** | blockifyapp.com — always lowercase, no space |
| **Brand name** | 'Blockify' — capital B, no space, no hyphen |
| **Company name** | 'Blockify Solutions' — for legal/formal contexts |

# 9. Social Media

## Active Channels

| Channel | Handle & Purpose |
|---|---|
| **YouTube** | @BlockifyApp — product demos, tutorials, feature walkthroughs |
| **Twitter/X** | @blockifyapp1 — announcements, product updates, community engagement |
| **LinkedIn** | /company/blockify-apps — B2B audience, company news, partner announcements |

## Content Principles by Channel

| Channel | Content approach |
|---|---|
| **YouTube** | Product-first. Show don't tell. Demos, setup guides, feature releases. Professional but accessible. |
| **Twitter/X** | Short, punchy, conversational. Merchant tips, quick wins, product updates. Engage with the Shopify community. |
| **LinkedIn** | Authoritative, data-driven. Company milestones, industry insights, partnership news. More formal tone. |

## Social Media Rules

| ✓ DO | ✗ DON'T |
|---|---|
| Use real merchant quotes and review excerpts | Do not post without proofreading — grammar matters for trust |
| Share product update screenshots with clean UI visuals | Do not make unverifiable claims without citing the source |
| Reference Shopify ecosystem news when relevant | Do not engage in competitor bashing |
| Engage with comments using real names (not brand-only) | Do not repost generic stock content unrelated to ecommerce/fraud |

# 10. Brand Do's & Don'ts

## Overall Brand Rules

| ✓ DO | ✗ DON'T |
|---|---|
| Lead with merchant benefits, not feature lists | Don't use the logo in unauthorized color variants |
| Use real metrics and social proof (500+ reviews, 20K+ merchants) | Don't make up new statistics — only use verified numbers |
| Show the 'Built for Shopify' badge prominently — it's a key trust signal | Don't use fear-based messaging that feels threatening to the user |
| Mention 24/7 support — it's a major differentiator | Don't use pure black (#000000) — use Ink (#1A1714) |
| Use the orange accent consistently for primary CTAs and key highlights | Don't use pure white backgrounds without warm surface cards |
| Keep the warm off-white background (#F5F2ED) for page sections | Don't overload pages with competing CTAs |
| Use 'ecosystem' when describing the suite of products | Don't describe products as 'software' — use 'app' (Shopify ecosystem language) |

# 11. Observations & Recommendations

This section contains observations from analysis of the current website alongside recommendations for brand consistency improvements. These are not criticisms — they are opportunities.

## 11.1 Strengths to Preserve

| Strength | Why it matters |
|---|---|
| **Proof-heavy homepage** | The stats row (20K+ merchants, 500+ reviews, $36M cancelled) is compelling. Keep this visible and up to date. |
| **Real testimonials** | Named, country-attributed reviews add authentic credibility. Continue collecting and displaying these. |
| **Support differentiation** | The midnight-response story in the reviews is a brand asset. Lean into 24/7 availability as a core message. |
| **'Built for Shopify' signal** | This certification is prominently featured and should remain a visual anchor on all marketing materials. |
| **Free tier availability** | The free plan lowers the barrier to trial. This should always be visible in pricing and acquisition messaging. |

## 11.2 Areas for Improvement

| Area | Observation & recommendation |
|---|---|
| **Tagline consistency** | The tagline varies across pages — 'Secure & Grow Your Shopify Store' vs 'Prevent Fraudulent to secure and grow your Shopify store'. Standardize to one hero statement. |
| **Grammar & copy polish** | A few instances of non-native English phrasing (e.g. 'Prevent Fraudulent') appear across the site. A native English copy review would strengthen brand credibility. |
| **Wix presence** | Blockify is available on Wix but this is underemphasized. Stronger Wix-specific messaging could expand the addressable audience. |
| **Blog visual style** | Blog post thumbnail imagery appears inconsistent in style and quality. A defined content visual template would create cohesion. |
| **Product page depth** | Feature descriptions are sometimes brief. Expanding with use-case examples and before/after scenarios would improve conversion. |
| **Brand beyond Shopify** | As Blockify expands to serve all online sellers (not just Shopify), the brand positioning should evolve — e.g. 'Protect Your Online Store' vs 'Protect Your Shopify Store'. |

## 11.3 Missing Brand Assets to Develop

- Defined typography specification with exact font names from CSS (currently inferred from visual analysis)
- Official icon library / design system file (Figma or similar)
- Email template with brand-consistent header, footer, and CTA buttons
- Presentation deck template for partner / sales use
- Social media post templates for each channel
- Press kit with logo files in all required formats (SVG, PNG dark, PNG white, favicon)
- Photography style guide for team photos, product screenshots, and blog imagery
